The Geyser Electric Washing and Wringing Machine Relieves You of the Hardest Task in Housekeeping

The Family Wash

You'd pretty soon snap up an investment that actually paid 100% profit in a year-and that is just what the Geyser does,

It'll pay for itself in the first year in servants' wages and wear on your clothes, and you have a lifetime of use still coming to make additional profits.

The Principle of the GEYSER Is Pure Common Sense

-A powerful circulation of hot suds is forced through the clothes by means of a high-speed propeller in the bottom of the tank. The water is also drawn back through the clothes by suction. This makes double washing and assures quick, thorough washing. There is no wear on the clothes. They are always under hot water in a constantly revolving cylinder. You wash 152 miscellaneous pieces of clothes in an hour. How many constitute your average wash? See the saving in time?

The Geyser is the most compact washing and wringing machine made of anything like the capacity. You won't miss the space it occupies. We'll send one to your home on TRIAL FREE

and without obligation. Phone Main 7320. Carroll Electric Co.
